## WASHERS, GASKETS PADS, STRIPS AND SHEET

Walker Rubber have supported their customers' needs for over 70 years and are one of the UK's leading manufacturers.

- Over 70 stocked Neoprene, Nitrile, EPDM, Silicone and Foam materials
- In house design, development & manufacture
- CNC precision cutting
- Same day manufacturing
- 'While you wait' trade counter service

We stock over 70 Neoprene, Nitrile, EPDM, Silicone and Foam materials to ensure almost everything can be made same day if required.

Our specialist rubber gasket cutting service considers every variable, ensuring we manufacture your components perfectly.

Our CNC equipment can accommodate sheets up to 2m wide and, when linked to a conveyor, can cut to any length required; subject only to the length of the raw material available.

We pride ourselves on excellent customer service, an outstanding product and swift turnaround from order to delivery. This is underpinned by our 'same day manufacture' service and a 'while you wait - make and collect' service at our Norwich trade counter.

## EXTRUSIONS, FENDERS & BUMPERS

Walker Rubber design, develop and manufacture all our tooling in-house. Our rubber extrusion products are used in a huge number of applications and in a multitude of different industries.

- Over 2000 standard profiles available
- New profiles in as little as 72 hours
- In house design, development & manufacture
- Product to your exact specification
- Manufacturing lead time from 48 hours

Many profiles are available from stock and if not, we can begin manufacture of all our extrusion products within 48 hours.

If you need a unique extrusion, we design, develop and manufacture our own extrusion tools here on site allowing us to deliver samples of new profiles in as little as 72 hours from receiving your order!

Depending on shape, size and the application, rubber extrusions can be produced in straight lengths or coiled. We will manufacture your new rubber extrusion profile to your exact specification, at low cost, with a fast turnaround in our UK factory and once you've approved your sample profile, we'll move quickly to complete your order.

Extrusions can be produced in a variety of different rubber compounds, each with unique qualities designed to perform in specific applications and environments.

Our portfolio of clients includes market leading organisations operating throughout the world in industries, spanning the

marine sector, motor manufacture, construction, food manufacturing, agriculture and many more.

We're just as proud of our long association with small and medium sized business operating in niche and evolving sectors such as renewable energy where our agility and expertise has helped small and start-up businesses bring new, successful and innovative products to market.

Alongside our rubber extrusions and gasket cutting services, we have also been supplying custom moulded rubber components since 1985.

- In house mould design & manufacture
- Custom moulding to your specification
- Wide range of materials available

Moulded products are almost always unique to you making an 'off-the-shelf' purchase impossible. With this in mind, we have a team on-site ready and waiting to assist you.

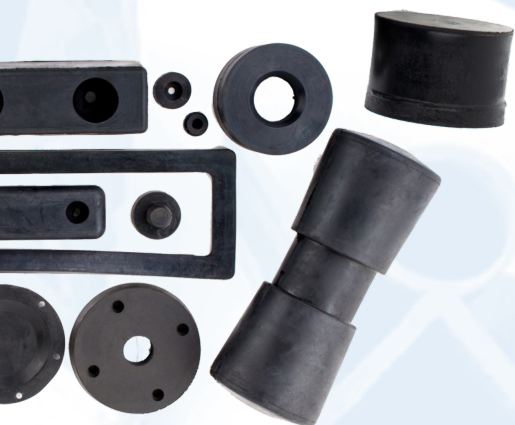

Once we have fully understood your requirements, we will be able to give advice on; the best material for the application; whether a multi-impression or a single cavity mould tool is required; tool design and manufacturing lead times.

- Rubber-to-metal bonding
- Roller re-covering service

Rubber can also be moulded directly onto metal components, giving a high-performing and long-lasting chemical bond between the two materials.

In addition to moulding new products, we also offer a re-covering service for rollers and crawler wheels, extending the lifespan of these components.

In recent years we have also developed an extensive network of specialist moulding partners with complementary skills and capabilities who share our service ethos. This ensures we're perfectly positioned to supply almost anything you need quickly and cost effectively.

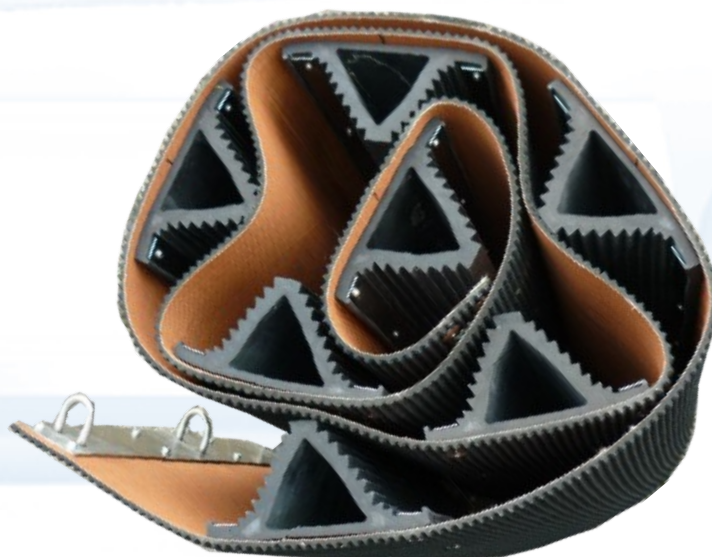

Designed primarily to serve our large and loyal local customer base in East Anglia, this huge selection of 'off-the-shelf' products and accessories is available to all our customers nationwide.

- Ducting, cord and tube
- Rubber and plastic hoses

- Rubber matting
- Specialist products

Alongside our selection of stocked products, we manufacture a range of specially developed products for specific applications; including firefighter pole mats, foam case inserts and rollaway bank ladders (pictured right).

These unique, heavy-duty, rollaway bank ladders are ideal for gaining access up and down uneven or slippery banks and slopes. Easily fixed into position with metal pins through a metal reinforcing plate, individual ladders can be connected to form longer lengths.

## WHAT MAKES WALKER RUBBER **DIFFERENT?**

---

### **SAME DAY COLLECTION/NEXT DAY DELIVERY**

Fast turnaround times and even same day on selected manufactured products

### **UK BASED ENGINEERING, DESIGN AND MANUFACTURING**

In house design and engineering expertise for fast and accurate new product development

### **VAST PRODUCT RANGE**

Wide range of materials and products always in stock at our UK warehouse

### **PROFESSIONAL SUPPORT**

Our team are just a phone call away and trained to look after you, your business and your customers

### **PRODUCT TRACEABILITY**

Back to source traceability with cure/manufacture dates across a wide range of polymers

### **KNOWLEDGEABLE STAFF**

Our team strives to provide the most cost effective solutions to your problems, both face-to-face, and over the phone

### **FAMILY RUN BUSINESS**

We pride ourselves on delivering a first-class service to all our customers as we have done since 1941.
